

Alex Rauenzahn

Senior Software Engineer · Enterprise Modernization · Cloud-Native Systems · Azure

Greater Seattle Area · 505.901.7639 · alex.rauenzahn@gmail.com · alexrauenzahn.dev · linkedin.com/in/alexrauenzahn

PROFESSIONAL SUMMARY

Solutions Architect and Senior Software Engineer with 6+ years leading enterprise modernization and cloud-native system design. Experienced translating complex business requirements into scalable architectures across Java and .NET. Specialized in secure API architecture: dual-auth systems using OAuth2/JWT and LDAP/LDAPS via Spring Security, deployed on Docker/Kubernetes across AWS and Azure. Pursuing AZ-104 and AZ-305 (Azure Solutions Architect Expert path). Targeting the Greater Seattle Area and remote-first teams. Direct hire only.

CORE SKILLS

Languages	Java 8+, C#, TypeScript, SQL
Frameworks	Spring Boot, Spring Security, Spring Cloud, React
APIs & Auth	REST/Microservices, OAuth2, JWT, LDAP/LDAPS
DevOps & Cloud	Docker, Kubernetes (Rancher), AWS, Azure, CI/CD (YAML), Azure DevOps, GitHub
Databases	Oracle, SQL Server - stored procedures, transactions, query tuning
Testing & QA	JUnit 5, Mockito, Postman, Insomnium
Build & Logging	Maven, Gradle, SLF4J, Logback

PROFESSIONAL EXPERIENCE

Senior Software Engineer

NRI North America (formerly Core BTS) · Remote · Feb 2022 – Present

- Architected the modernization of a core Java 8 service to Spring Boot 2.7 / Spring Cloud, driving resilience and scalability under strict uptime SLAs.
- Designed and led secure REST API architecture with dual authentication via OAuth2 (JWT) and LDAP/LDAPS using Spring Security filter chains aligned to enterprise security controls.
- Diagnosed and resolved production issues across concurrency, performance, memory behavior, and transaction boundaries; improved observability with structured SLF4J/Logback instrumentation.
- Deployed and operated Dockerized microservices in Kubernetes (Rancher) backed by Oracle DBMS; supported API validation and CI/CD release workflows via GitHub PRs and Postman/Insomnium.
- Rebuilt internal tooling in React/TypeScript and led test-automation integration into Azure DevOps pipelines, measurably reducing regression risk at release time.

Software Engineer

Chenega Corporation — U.S. Department of Energy · Feb 2020 – Feb 2022

- Developed and maintained C#/ .NET and SQL Server applications in a security-sensitive federal environment with strict compliance requirements.
- Implemented backend features and stored procedures; participated in rigorous code reviews and testing cycles to uphold reliability and security standards.
- Operated within a Q-level security clearance context, gaining experience with classified data handling, access controls, and federal IT governance.

PORTFOLIO & PROJECTS

Portfolio and architecture case studies at alexrauenzahn.dev, including system design deep-dives, open-source work, and technical writing spanning cloud-native systems, enterprise modernization, and AI agent development.

EDUCATION

Bachelor of Arts, History

University of New Mexico
